

Edgefield Lumber Corporate Overview

As the region's exclusive manufacturer and distributor BluWood, a lumber resistant to mold, moisture, fungi and termites, Edgefield Lumber Company is committed to providing its customers with materials to Build Bright.

Founded in 2007 Edgefield Lumber Company is headquartered in Loxley, Ala., and offers smart solutions for home builders in the Gulf South region. The company's management includes Mason McGowin III, president, and Greg Wells, vice president of sales. Randell Robinson, former General Manager of Rocky Creek Lumber Company, serves the company's as the production manager.

Edgefield Lumber Company serves the gulf coastal region including Alabama, Mississippi, Louisiana, Arkansas, Tennessee, and the Florida panhandle. With a capacity to treat upwards of 50 million board feet of lumber per year, Edgefield is poised for growth.

What does it mean to BUILD BRIGHT?

To Build Bright means to make smart choices in home building. That includes protecting your home from mold damage and termite infestation. These issues are more important now than ever, especially in the coastal regions where mold has increasingly become a concern, and the damaging effects are not always covered by home owners insurance.

With BluWood, home owners can be worry-free when it comes to mold in their home, and the related allergy and asthmas problems mold can cause. BluWood also alleviates the re-building frustration that comes from termite damage.

What is BluWood?

BluWood is the only product of its kind on the market. BluWood features the Perfect Barrier Infusion System®, a factory applied two-part coating that defends wood framing materials from mold, moisture, fungi and wood destroying insects. Perfect Barrier® creates a water repellent, vapor permeable film to protect the wood components of your home.

How is BluWood different from traditional wood?

Unlike traditional framing lumber or pressure-treated wood products, protection is built into the wood, giving BluWood combative power against the effects of moisture, mold, fungus, and termites. Ideal for both interior and exterior applications, BluWood is safe for homeowners and on the job-site, without any harmful chemicals for families or the environment. And all BluWood products are backed by a Limited Lifetime Warranty.
